

introducing the most comprehensive parts database, right on your desktop.

Stop living inside the web browser.

Keeping your part lists up to date no longer has to be done through a web browser. Get the power of the most comprehensive parts database, without having your part list leave your intranet. Let SiliconExpert's Desktop Part Manager run in the background and stay updated on lifecycle status, RoHS, datasheet changes and inventory levels from over 120 distributors.

Did we mention we'll even let you scrub parts by giving you access to our 150+ million strong parts database? Scroll down to get details on product specs, features & our free demo.
