

Data is only part of the Journey

> A platform that navigates a successful parts management plan through structured and reliable data...

With the SiliconExpert toolset, customers not only are educated on the many challenges inherent to a typical product lifecycle and supply chain management process, but also empowered through proactive and strategic tools to mitigate the risks and drive efficiencies within the supply chain.

> What is SiliconExpert GPS?

SiliconExpert GPS is the premiere unified product development and administrative support suite for parts management. Guided, Proven, Solutions. With twenty years of experience in Supply Chain data analytics, SiliconExpert brings the most insight to both electrical and mechanical component availability.

> Framing the Platform via Guided, Proven, Solutions (GPS)

PRIMARY Coordinates — These cover most use cases and customers situations with solid coverage in the application, giving the right solution every time.

- **Obsolescence Management**
- **Compliance Management**
- **Supply Chain Continuity**
- **Product Design**

SECONDARY Coordinates — Customer needs enter these coordinates at times with evolving and changing market condition as well as industry specific situations.

- **Resource Constraints**
- **Market Availability, Pricing & Lead Times**
- **Supplier & Component Verifications**
- **Cost Management & Efficiencies**
