

An End-to-End Data Resource for Engineers, Compliance Managers, Supply Chain Engineers, OEMs, and More

SiliconExpert's P⁵ Platform is designed to help you get the most out of your product pipeline – from managing mission-critical parts and allocating resources to anticipating future supply chain disruptions and tracking product life cycles.

Universal Part Search

With easy access to SiliconExpert's vast data repository, you can access your BOM information, stay in tune with part changes and BOM modifications, and submit/track questions and requests directly with the SiliconExpert customer support team.

BOM Analysis

Keep your supply chain flowing with detailed reports that will assess your BOM for potential disruption risks. SiliconExpert checks for life-cycle risks, multi-sourcing opportunities, compliance, and inventory availability.

Proactive Alert Tracker

The alerts module helps keep you informed of part and BOM changes as they occur. With custom filtering, you can act on only those alerts that are most relevant and manage your alerts that require further action or can be archived.

Why SiliconExpert's P⁵ Platform?

With a database of over 1 billion parts, the SiliconExpert P⁵ Platform helps you stay ahead of the pack in a competitive landscape. The SiliconExpert P⁵ Platform helps you reallocate resources, both in terms of time and costs, to maximize profit margins and limit unanticipated costs. Our tools also help secure uninterrupted production cycles for your manufacturing facilities, keeping your shipments on time and on track. The result is improved financial stability and profitability.
