

# Up-to-date Parts Information in Your Risk and Obsolescence Management Tool

SiliconExpert is the industry's leading semiconductor and mechanical component data repository — helping you protect your production process from beginning to end. But having the right data is only helpful at the right time.

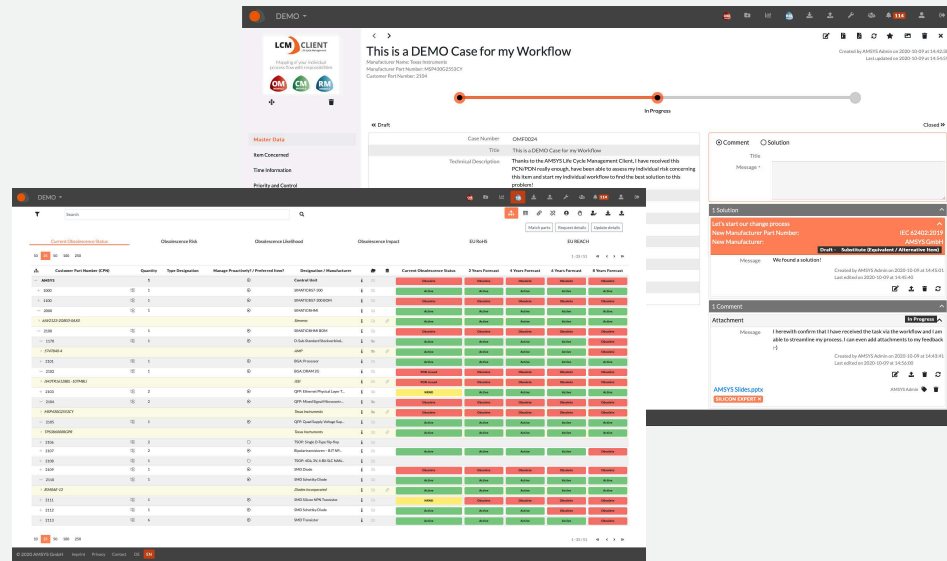

## AMSYS Life Cycle Management Client - Powered By SiliconExpert

Through our integrated API offering you get the power of SiliconExpert directly within the AMSYS LCM Client's risk assessment and workflow management modules. You get all information you need where you need it. Here's how:

### Amsys LCM Client

The AMSYS Life Cycle Management (LCM) Client individually maps customer's processes in its Obsolescence Management (OM) Module to automate obsolescence case management. The Risk Management (RM) Module allows customizable risk analysis compliant to the IEC 62402 standard, aggregating SiliconExpert's and customer's internal data.

### LIFE CYCLE, COMPLIANCE, COST, CROSSES — ALL A CLICK AWAY

Find the data you need to stay ahead at your fingertips. Instantly access information to:

- Help manage risk, workflows and costs.
- Identify the right parts.
- Ensure that you are in compliance.

Change the way you work with fully-traceable actions.

Contact us today to learn more about how SiliconExpert Connect can help your engineers design the products of tomorrow.
