SILICONEXPERT () arena Supplier Item

SiliconExpert is the global leader in the electronic component and supply chain solutions. Over 500 data engineers and analysts power SiliconExpert's extensive database of 1 billion+ parts and risk mitigation tools.

Build for tomorrow with SiliconExpert.

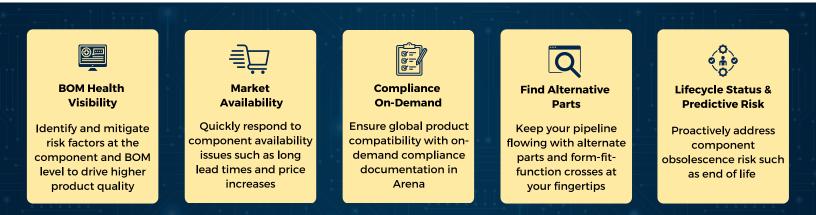

Reduce Risk in Your Supply Chain with Supplier Component Visibility

Arena's PLM with the power of SiliconExpert data* brings visibility to your entire product lifecycle with component level information for availability, compliance status, cross references, PCNs, datasheets and compliance documentation – all without leaving Arena.

There are two views within Arena's PLM:

- Supplier Item Lookup Get a singular view of SiliconExpert's current electronic component database including market availability and compliance dataEnsure that your BOM has complete information, including information on custom parts and information that is not publicly available
- BOM Lookup View current availability from authorized suppliers and availability of component documentation at a BOM level.

Who Benefits

Engineers

With market availability for all of the components in their BOMs engineers can:

- Quickly identify availability issues, high risk parts, and compliance changes that can cause production disruptions.
- Access the latest component information and ship quality products, on time.

The Company

Reduce overall supply chain risk with visibility to critical components across the entire product to:

- Avoid costly supplier delays, improve product quality, and ship products on time.
- Avoid gaps in component and material compliance evidence to meet evolving global regulations such as RoHS, REACH, material declarations and conflict minerals.

*An API license must be purchased from SiliconExpert to integrate data into Arena's PLM
